Mobile Access on demand technical training

Introduction

- This in-person training covers the steps needed to setup a working environment where personnel and visitors can have access to buildings and parking based on credentials on their phone.

- Training will demonstrate how to:
 - Set up Mobile Access in Access Management System (AMS)
 - Install Mobile Access
 - Issue mobile credentials with Credential Management and/or Visitor Management

Mobile Access on demand technical training

Practical information

- **Location:** Training can be held at a Bosch location or customer sites
- **Audience:** Installers, Programmers, Sales Engineers, System Integrators
- **Prerequisites:**
 - A mobile phone per person
 - Bosch Mobile Access application downloaded on the phone
 - Experience with Bosch access products or take online training at Bosch Building Technologies Academy
- **Duration:** 4 hours
- **Price:** EUR 300 per person
- **Languages:** The training is offered in English and available in German and Dutch on special request

Mobile Access on demand technical training

On-site option

- The customer needs to provide a networked computer that meets the AMS system requirements
- The trainer will bring the rest of the necessary equipment

Mobile Access on demand technical training

System requirements

Minimum technical requirements for AMS client

▪ Operating system:

- Windows 10 Version 1809 LTSC
- Windows 10 Professional and Enterprise, Version 20H2

▪ Hardware:

- Intel i5 or higher
- 8 GB RAM (16 GB recommended)
- 25 GB of free hard disk space
- Graphics adapter – 256 MB RAM
- To use the AMS Dialog manager, a resolution of 1280x1024 is sufficient.
- For AMS Map view, a resolution of 1920x1080 (Full HD) is required.
- At least 32 k colors
- DirectX® 11
- 1 Gbit/s Ethernet card
- A free USB port or network share for installation files

System requirements

Minimum technical requirements for AMS server

▪ Operating system:

- Windows Server 2016, Windows Server 2019 (64 bit, Standard, Datacenter)
- Windows 10 Version 1809 LTSC, Windows 10 Professional and Enterprise, Version 20H2

▪ Hardware:

- Intel i7 processor generation 8
- 16 GB RAM (32 GB recommended) 25 GB of free hard disk space
- 250 GB of free hard disk space
- Hard disk transfer rate 300 MB/s with < 10 ms average response time (SSD recommended)
- Graphics adapter with: 256 MB RAM, A resolution of 1280x1024 (Use the graphic resolution recommended for the client if you wish to run the Map View client on the AMS server).
- At least 32k colors
- 1 Gbit/s Ethernet card
- A free USB port or network share for installation files

Mobile Access on demand technical training

Meet the trainer

- Robert Hogeweg is our very experienced trainer, who has been providing technical training in Bosch Security Systems since 2011
- He emphasizes hands-on learning to ensure practical and engaging training sessions
- Robert is willing to travel to your location, if you prefer to hold the training on-site
