

## **Bringing audio and visuals together for more efficient meetings.** An integrated solution by Bosch and Element One

### **Challenges**

Professional board meetings continue to be an important decision-making tool and a pivot to building a culture in any organization. They're essential for good team communication, enabling collaboration, creativity and innovation. However, it has become critical to figure out how to make your company's meetings more efficient and productive.

### **Market requirements**

If the data presented on the monitor are directly related and have consequences for the outcome of the discussion, the members should be able to view the data conveniently. This could be presented via an individual monitor or a central screen. High audio quality is key to understanding what all members are saying in a clear way. This becomes even more important when members attend remotely.

In partnership with

# Our solution: Complete integration with all functionalities

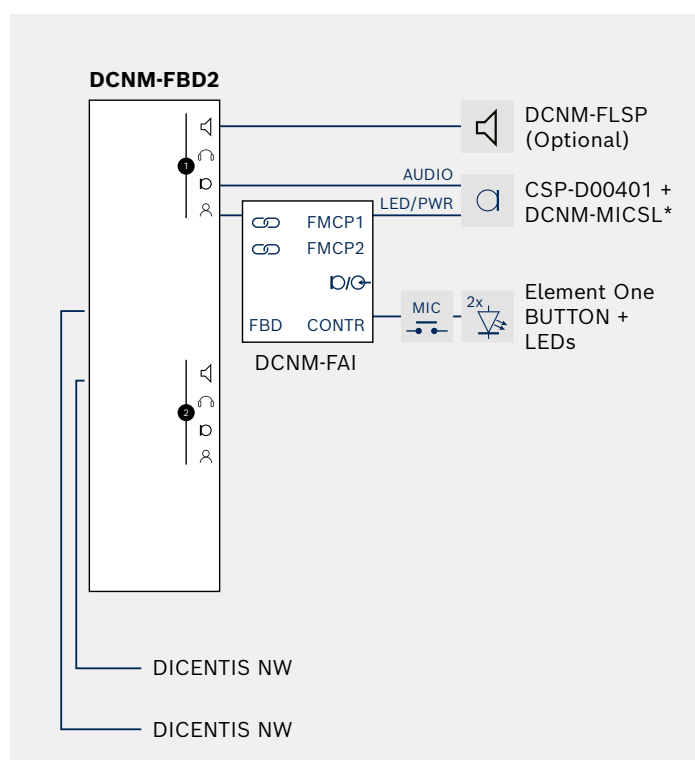

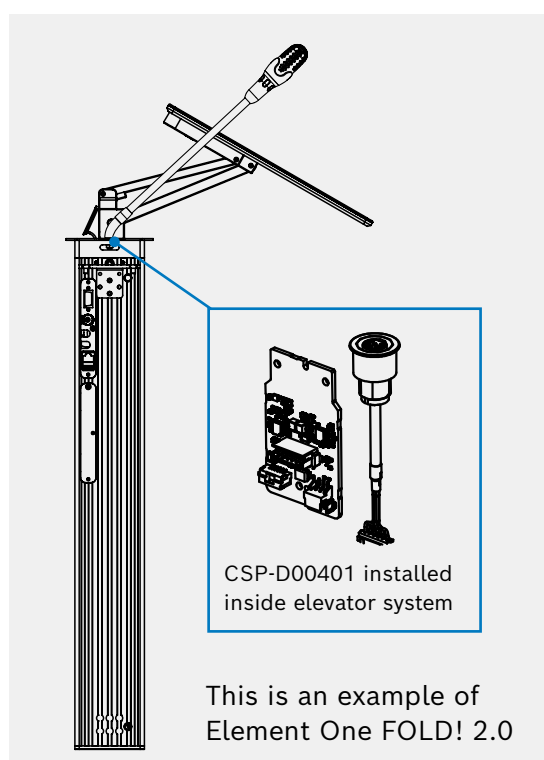

The DICENTIS conference system maximizes speech intelligibility to make your meetings more efficient and more productive. With an IP- and server-based architecture, it is built on open standards to ensure a high degree of flexibility, superior audio performance for up to 100 languages, and enable third party integration. The system harnesses the most powerful security protection on the market to safeguard sensitive data throughout the conference chain.

The DICENTIS Participant Application expands the capability of the DICENTIS Conference System while providing maximum flexibility to its users. It is a native app that can run on standard off-the-shelf Android devices with a screen size of your choice. The app improves the meeting experience for the participants by offering additional control, meeting data, and multimedia content. It enables the participants to request to speak, cast votes, and access meeting information, such as the agenda topics and document links, from a standard tablet that is connected to a discussion device.

## Element One solution: Retractable screens and microphones

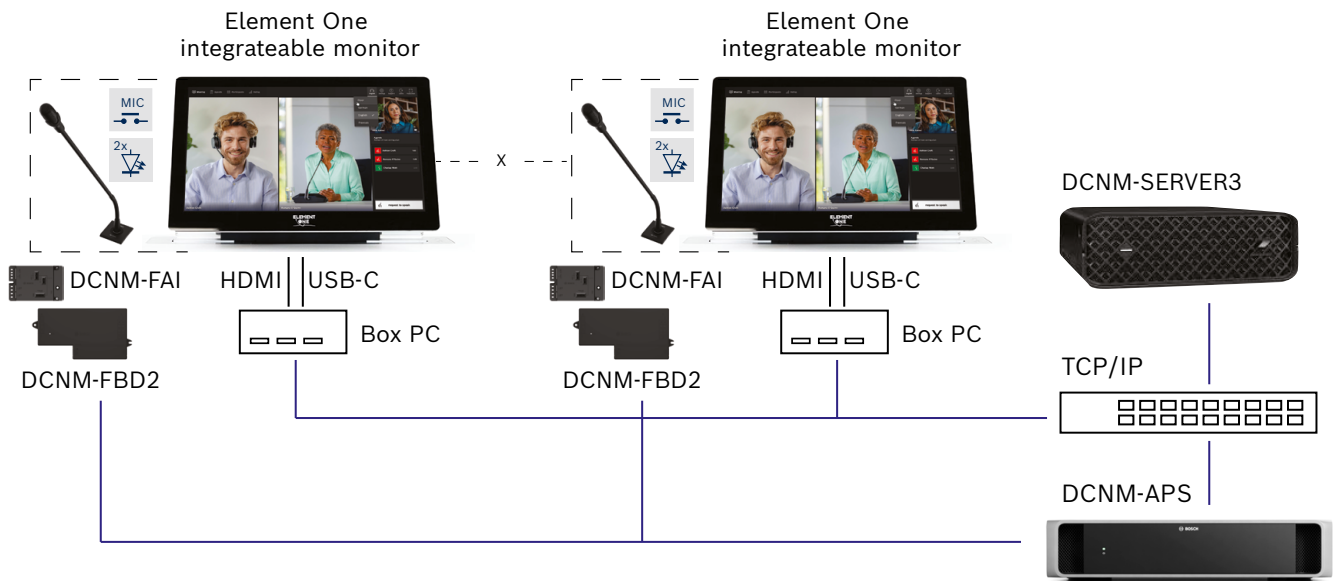

The latest screen technologies as an essential part of media technology are continuously incorporated into our development processes and are taken into account in the design. The power of innovation and perfect integration has earned us the attention of the world's most renowned and influential decision-makers. They trust and rely on our screens and integrable monitor solutions – in their meetings, in court hearings, in parliamentary debates and congresses. Design and practical innovation have always been an essential part of the Element One ethos. Retractable, integrateable monitors and perfectly designed audio-visual media technology. Made and thought to make meetings more effective. It's part of our DNA, so to speak. You can feel it in every product, every project, every conversation.

The focus on high-quality materials, technical progress and – of course – exquisitely beautiful aesthetics drive us. It makes Element One the innovator in the field of Integrateable Media Technology and Monitors.

### Application example:

The total solution consists of an elevator system and touchscreen monitor by Element One, a DICENTIS Flush microphone system and a Box PC on which the DICENTIS participant app will be installed.

### Create bill of required material:

- The required DICENTIS devices can be found here: <https://commerce.boschsecurity.com/gb/en/DICENTIS-Conference-System/c/12199520395>
- The required Element One devices can be found here: [elementonescreens.com](http://elementonescreens.com)
- Be aware: the DICENTIS microphone kit "CSP-D00401" will be ordered by Element One and added to their offering.

### Benefits for the end user (chair people, participants and operator)

- High quality audio, video and data sharing during professional meetings
- When not in use all sensitive equipment is stored within the table
- Enriched meeting experience with additional control, meeting data and multimedia content
- Request to speak and cast votes available via the DICENTIS Participant App

### Benefits for the system integrator/installer:

- Complete, seamlessly integrated solution with our official integration partner Element One
- Peace of mind from a tested and approved solution
- User-friendly, customizable solution with comprehensive features according to individual needs
- Easy to install and configure
- DICENTIS participant app runs on standard off-the-shelf Android devices with any screen size
- Easy linking to the DICENTIS devices for an enhanced user experience
- Easy IT management with simple device replacements and security updates
