

ACE Toolkit:

Empowering Architects, Consultants & Engineers

Design Smarter. Specify Confidently. Build Securely.

Architects, Consultants and Engineers play a vital role in the security ecosystem, and Bosch is committed to supporting the design community with the tools, specs and expertise needed to help you turn concepts into compliant, buildable security solutions.

Program Benefits

- Specifications CSI MasterFormat Div-28 + Div-25
- BIM Resources - Revit families
- CAD - DWG Files
- Bluebeam Toolchest
- Design Guides - Security planning handbook
- Direct Support - ACE manager and regional support
- Technology Roadmap Access - Insight into Bosch R&D pipeline

How It Helps You Win

- Save design time with pre-built spec packages
- Reduce project risk with vetted solutions like cybersecure and NDAA compliance
- Gain a competitive edge by offering advanced AI video, integration and analytics
- Network with industry peers through the ACE Board of Advisors and exclusive events

Project Highlight

When a major data center project in Northern Virginia needed end-to-end video and access control design, their A&E team leveraged Bosch's ACE Toolkit to align specs, BIM content, and compliance, saving months of design iteration and avoiding costly RFI cycles.
